Summary

SDE3 (Senior Software Engineer) with 8 years of experience building scalable, high-performance systems and leading engineering teams. Expertise in backend architecture, microservices design, cross-team coordination, and mentoring early-career engineers. Proven track record of reducing operational overhead, improving system reliability, and driving technical initiatives across multiple teams.

Skills

- **Programming Languages:** Java, Golang, Python, React, Kotlin
- **Backend & Frameworks:** FastAPI, GraphQL
- **Datastores & Data Processing:** PostgreSQL, SQL, NoSQL, Kafka, Cassandra, Redis, Solr, Elasticsearch
- **Logging, Monitoring & Alerting:** Kibana, Grafana, New relic
- **Infrastructure & DevOps:** AWS, Git, Jenkins
- **Core Competencies:** Algorithm Implementation, Microservices Architecture, System Design, Performance Optimization

Experience

Senior Software Engineer 3 | Multiplier, Bangalore, India

03/2025 – 03/2026

- **Invoicing Automation:** Designed and implemented **4 new invoicing types (Off-cycle, VAS, Insurance, Late Payment Fee)**, reducing manual Finance workload by **70%** and eliminating human error-prone processes.
- **Insurance Invoicing Engine:** Built a high-impact insurance invoicing system with complex logic from scratch, enabling Finance to process a new revenue stream with improved accuracy and operational efficiency.
- **Anomaly Detection:** Developed Invoice Anomaly Detection (IAD) module that caught **8** previously missed anomalies; implemented auto-authorization for successful checks, removing manual Finance approval.
- **Domain Expertise:** Quickly onboarded to the invoicing engine, gaining deep domain expertise and contributing to critical billing workflows.

Senior Software Engineer | Myntra, Bangalore, India

10/2021 – 03/2025

- **System Re-architecture:** Led **end-to-end re-architecture** of a core revenue and seller-facing service, reducing on-call read issues by **40%** and improving response times by **70% (read) and 95% (write)**.

- **Search Optimization:** Designed and implemented a hierarchical categorization search for beauty products, reducing cognitive load and improving the discovery experience.
- **Compliance & Policy:** Built and delivered compliance-driven food de-listing workflow under strict deadlines, ensuring operational efficiency and policy adherence.
- **Infrastructure Modernization:** Owned org-wide RabbitMQ deprecation, migrating **200 queues** across **18 services** to Confluent Kafka; drove Kubernetes migration and optimized Redis usage.
- **Reusable Frameworks:** Contributed to common libraries by building reusable Java frameworks (Audit, Transformation, and Recon), improving consistency and accelerating service onboarding.

Software Engineer II | Info Edge India

04/2019 – 10/2021

- **Client Interaction Revamp:** Revamped the response viewer from scratch, significantly enhancing client interaction with leads and responses.
- **Microservices Migration:** Migrated registration response LAMP stack code to low-latency microservices, resulting in APIs responding within **70 ms** and a **140%** increase in registrations.
- **Lead Management:** Designed and implemented a lead management system from scratch, reducing delivery time from **1 minute** to **2-3 seconds** via direct LMS integration.
- **Asynchronous Processing:** Introduced and implemented Kafka Libraries to de-link async tasks from all core modules.

Software Engineer | Info Edge India

06/2018 – 03/2019

- **Performance Engineering:** Optimized the Online Application Form module, reducing queries by 90% and improving page load speed by **200%**.
- **Data Integrity:** Developed an alert system to monitor and report data discrepancies in real-time.
- **Project Leadership:** Served as SPOC/lead for the Shiksha porting and response module, accounting for **70%** of response delivery to clients.

Leadership & Mentorship

- **Team Leadership:** Led a team of 2 junior engineers during a critical Speed Delivery project at Myntra, providing technical mentorship, detailed code reviews, and knowledge transfer.
- **Cross-Team Coordination:** Successfully coordinated large-scale technical initiatives across 8-10 stakeholders during the RabbitMQ to Kafka migration, managing complex dependencies and technical constraints.
- **Stakeholder Management:** Collaborated regularly across Product, Finance, and Engineering teams to translate complex business requirements into robust technical solutions.
- **Quality Standards:** Active contributor to architectural design discussions, code reviews, and comprehensive technical documentation to ensure long-term software quality.

Education

- **Bachelor of Technology, Computer Science (2014-2018)**
 - Indraprastha Institute of Information Technology (IIIT), Delhi

Accomplishments

- **Winner, Rain AI Hackathon @ Multiplier:** Designed an AI-driven solution with high business impact.
- **3rd Place, Myntra Hackerramp:** Competed against org-wide teams on innovative technical problem-solving.
- **BU Excellence Awards:** Honored with the highest number of awards within the Business Unit @ Myntra for Teamwork, Customer Focus, and Excellence.
